DETAILED ACTION

Election/Restrictions

1. Claims 12 and 18 as amended directed to the following patentably distinct species: the specie of treating a surface of a member by cyclically and periodically producing **pulsed changes in at least one of the pressure and the flow rate** of the treatment fluid, circulating within the closed processing cup, as recited in claim 12 and the specie of treating a surface of a member by **periodically reversing flow direction** of the treatment fluid circulating in the closed processing cup, as recited in claim 18. The species are independent or distinct because they require the use of different surface treatment technique and therefore different processing steps.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed specie recited by claim 12 or claim 18 for prosecution on the merits to which the claims shall be restricted.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Applicants are advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Applicants are reminded that since 37 CFR 1.142(a) provides that restriction is proper at any stage of prosecution up to final action, a requirement may be made when it becomes proper, even though there was a prior requirement with which applicant complied. **Ex parte Benke**, 1904 C.D. 63, 108 O.G. 1588 (Comm'r Pat. 1904).
